Representing the Manufacturer

INTERMOUNTAIN MARKETING, INC. (IMM) is an independent Manufacturer's Representative and Security Systems Design Consultant Firm. IMM represents numerous Manufacturers of Closed Circuit Television, Access Control and related Electronic Security Products.

MARKETING

IMM's principal method of bringing products to market is through direct contact with security systems integrators, security equipment distributors, architects and engineers. The company also utilizes direct mail promotions, catalogs, newsletters, the internet @ **www.immrep.com**, and product seminars/training courses to promote our product lines. Further, the company provides design and consulting services directly to end users, promoting brand name recognition and brand requests by the end user.

TRAINING FACILITY AND SUPPORT

IMM believes training and support to be essential ingredients to the development of the marketplace. Training and support programs insure proper implementation of the product and creates satisfied dealers and end users. IMM's complete training facility provides a hands on positive learning environment. The IMM philosophy is simple: **Total Customer Satisfaction**.

COMPUTERIZED ORDER PLACEMENT AND TRACKING

IMM processes customer orders via our computerized order entry system to insure accuracy and product compatibility, as well as to provide design assistance, and real time order tracking. Potential problems for the Customer and the Manufacturer are minimized from conception through execution to completion.

EXPERIENCE

Bob Fruchey | Bob@immrep.com | Mobile 303.668.0577

Bob has many years of experience designing, specifying and marketing security systems and integrated solutions. He left IMM in 1997 to serve as the Western Region Sales Manager for Fiber Options, Inc. After the M&A with GE Bob, returned to IMM as the Managing Partner, Vice President, in December 2001. He purchased IMM in October 2004.

Mike Roth | MikeR@immrep.com

Mike has many years of experience assisting organizations to proactively solve network communications challenges. He is currently driving design and deployment of Network Services for Smart City applications. Network Services include Fiber PON and Wireless utilizing Private 5G, CBRS, LoRaWAN and Edge Computing supporting a variety of vertical markets which include healthcare, transportation, education and manufacturing.
